TESTIMONIALS

“They were very knowledgeable on the software and the multiple platforms we were working on integrating due to a company merger. They gave us several different options with insight on what would work best from a systematic ongoing to approach and they were RIGHT! We could not have done it without them.”

“They are experts in the field, have tremendous software experience, are efficient at implementation and will go above and beyond at each step.”

“Trust the consultants at ATS Consulting – they really know what they are doing.”

“In addition to a deep understanding of the software product to the ATS team were also great project partners and felt like team members rather than external resources. They were focused on implementing a solution that met our specific needs and supported our business process rather than just configuring a product.”

UKG PRODUCT INTEGRATION – PARTNER SPECIALTY

ATS Consulting is uniquely positioned and experienced to support North American and global mergers, acquisitions, and divestitures. Our team is involved in a high volume of UKG Pro and Workforce Management master splits and clones to ensure timely and accurate payroll on time.
